**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Applicant claims an autoclave package containing a product therein, and comprising a fiber-based packaging material treated with a hydrophobic size and comprising an inside and/or outside of the fiber substrate one or more layers for reduced water penetration, the package having been treated under pressure at a temperature of 100 to 250 °C for a time of 5 min to 30 h in water vapor, wherein the fiber substrate has been treated with a hydrophobic size, an aluminum compound and a wet-strength size for increased heat resistance of the packaging material, the hydrophobic size has been used in an amount of 0.5 to 30 kg/t of dry fiber substrate with the weight ratio of the hydrophobic size to the aluminum compound is 1:0.5:1:5, and the layer for reduced water penetration of the packaging material comprises a polymer coating.

2. Additionally, applicant claims a method for autoclave treatment comprising using a combination of an aluminum compound, a hydrophobic size and a wet-strength size for increased autoclaving heat resistance of a product package made of a fiber-based packaging material, such as reduced raw-edge penetration, in autoclaving under pressure at a temperature of 100 to 250 °C for a time of 5 min to 30 h, wherein the autoclaving is carried out in water vapor.

3. Applicant also claims a method for autoclave treatment of a product package comprising a fiber-based packaging material treated with a hydrophobic size and comprising on the inside and/or outside of the fiber substrate one or more layers for reduced water penetration, comprising treating a fiber substrate with a hydrophobic size, an aluminum compound and a wet-strength size for reduced raw-edge water penetration

Art Unit: 1786

of the packaging material, the weight ratio of hydrophobic size to the aluminum compound being 1:0.1-1:10; and autoclaving the package under pressure with the aid of vapor at a temperature of 100 to 250 °C for a time of 5 min to 30 h.

4. Applicant also claims an autoclave package containing a product therein and comprising a fiber based packaging material treated with a hydrophobic size and comprising an inside and/or outside of the fiber substrate one or more layers for reduced water penetration, the package having been treated under pressure at a temperature of 100 to 250 °C for a time of 5 min to 30 h in water vapor, wherein the fiber substrate has been treated with a hydrophobic size, an aluminum compound and a wet-strength size for increased heat resistance of the packaging material, the hydrophobic size has been used in an amount of 0.5 to 30 kg/t of dry fiber substrate with the weight ratio of the hydrophobic size to the aluminum compound is 1:0.5:1:5, and the packaging material comprising in the following order: a polymer heat-sealing layer, a white-pigmented polymer layer, a polymer layer containing black pigment, a treated fiber substrate, one or more polymer oxygen-barrier layers, a binder layer, a grey-pigmented polymer light-shield layer and a polymer heat-seal layer.

5. The closest prior art, Rohlf et al., U.S. Patent Number 6,489,040, discloses paper cover sheets that have a size of alkenyl succinic anhydride (ASA), a wet-strength size such a polyamide epichlorohydrin resin and alum added in the amount of 0 to 30 pounds per ton and ASA is added in an amount of 1 to 25 pounds per ton. Rohlf discloses that the cover sheets are heated under pressure at temperatures of about 150-200 degrees for about 45 minutes. Rohlf fails to teach or suggest a package containing a product therein and a polymeric coating on the layer for reduced water penetration. Additionally, Rohlf

Art Unit: 1786

fails to teach or suggest autoclaving the packaging material. Also, Rohlff fails to teach or suggest the packaging material comprises a polymer heat-sealing layer, a white-pigmented polymer layer, a polymer layer containing black pigment, a treated fiber substrate, one or more polymer oxygen-barrier layers, a binder layer, a grey-pigmented polymer light-shield layer and a polymer heat-seal layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
